Innovazione e Ambiente

Degrea si avvale delle più moderne tecnologie produttive per i vasi in terracotta che, unite all'uso di una miscela di argille naturali garantiscono ai vasi **un'ottima resistenza meccanica che rende pressoché nulla la percentuale di rotture durante il trasporto**. In questi anni Degrea è riuscita a soddisfare le richieste del mercato tradizionale, portando anche **innovazione con**

nuove linee di prodotti, oggi imitati, ma dalla qualità ancora ineguagliata.

La formatura, essiccazione e la cottura, effettuate con sistemi tecnologici più avanzati nel settore, conferiscono ai prodotti **un'ottima resistenza meccanica e una resistenza al gelo** che, unitamente al design ricercato, donano alle nostre creazioni quella **qualità sulla quale Degrea fonda da anni il suo successo**.

L'attenzione e la cura per un prodotto così naturale non potevano prescindere dal **massimo rispetto verso l'ambiente** con particolare attenzione alle fonti energetiche utilizzate.

E' con questa sensibilità che Degrea ha realizzato un impianto per la produzione di energia elettrica da pannelli fotovoltaici che copre per oltre il 50% il proprio fabbisogno e che consente il **risparmio di oltre 450 tonnellate annue di emissioni di Co2 in atmosfera**.

Innovation and respect for the Environment

Degrea makes use of the most modern production technologies for the terracotta pots that together with the use of a mix of milled and dried filtered natural clays, guarantee the pots a smooth surface, the right porosity and an excellent mechanical resistance that makes basically insignificant the percentage of breakages during the transport. In the last few years Degrea has managed to satisfy the demands of the traditional market, but has also introduced different innovations with new lines of products, which are being imitated by now, although their quality has no equal yet. The moulding, drying and firing, performed by means of the most advanced technological systems, pass on the products an excellent mechanical resistance and make them resistant to cold, which along with the design are the most appreciated qualities of Degrea products.

Attention and care for such a natural product cannot ignore the utmost respect for the environment, particularly the energy sources used. On the basis of this sensitivity, Degrea has designed a photovoltaic panel electric power production system which covers over 50% of its requirements, thus making it possible to save over 450 tons of CO2 emissions into the atmosphere every year.

Innovation et environnement

Degrea utilise les technologies productives les plus modernes pour ses vases en terre cuite qui, avec l'utilisation d'un mélange d'argiles naturelles broyées et filtrées à sec, garantissent aux vases une surface lisse, une porosité juste et une résistance mécanique optimale qui rend presque nulle le pourcentage des ruptures pendant le transport.

Pendant les années dernières, Degrea a satisfait les requêtes du marché traditionnel mais a porté aussi d'innovation avec nouvelles lignes de produits, aujourd'hui imités, mais avec de la qualité qui ne peut pas encore être égalée.

L'attention et le soin d'un produit si naturel ne pouvait pas faire abstraction du plus grand respect vers le milieu avec une attention particulière pour les sources énergétiques utilisées. C'est avec cette sensibilité que Degrea a réalisé une installation pour la production électrique de panneaux photovoltaïques qui couvre outre le 50% de ses propres besoins et qui permet d'épargner outre 450 tonnes d'introduction de CO2 dans l'atmosphère chaque année.

Terracotta Graffiata

La linea Terracotta Graffiata propone una linea moderna di vasi che sposano tradizione e modernità grazie alla forma, all'estetica e alla scelta di un materiale antico e attuale nello stesso tempo. L'esclusiva lavorazione Graffiata del bordo dona eleganza, aggiunge alla tradizionale forma liscia del vaso un elemento decorativo che ne slancia le forme e lo rende ornamentale per l'ambiente che lo circonda. L'effetto naturale del contrasto di colore tra il bordo e la parte inferiore del vaso è l'elemento caratterizzante di questa idea.

Graffiato (scratched) is a modern line of vases which combine tradition and modernity, thanks to their shapes, aesthetics and the choice of a material which is both ancient and modern at the same time. The exclusive (and for this reason often imitated) scratched processing of the edge makes vases elegant, adds a decorative element to their traditional smooth shapes which make them more agile and ornamental for the surrounding environment. The natural effect of the colour contrast between the edge and the lower part of the vase is the peculiarity of this DEGREA idea.

La Terracotta Graffiata propose une ligne moderne de vases qui épousent tradition et modernité grâce à la forme, à l'esthétique et au choix d'un matériel antique et actuel dans le même temps. Le travail égratigné du bord, très exclusif, et pour ce motif le plus copié, donne élégance, ajoute à la forme lisse traditionnelle du vase un élément décoratif qui en élance les formes et le rend ornemental pour le milieu environnant. L'effet naturel du contraste de couleur entre le bord et la partie inférieure du vase c'est l'élément caractéristique de cette idée.

Terracotta Arena

La linea Terracotta Arena è stata creata per rispondere al crescente interesse per i vasi che hanno il sapore di una civiltà passata. La colorazione chiara richiama la terra antica e risponde appieno a queste esigenze incontrando il gradimento della clientela attratta dal sapore mediterraneo ed antico che ne rievoca, dando ad ogni prodotto una sensazione di unicità.

The Arena line has been created following the increasing interest for pots which echo a past civilization. Its clear colours resemble ancient earth and fully fulfills these requirements, making it one of the most successful as far as sales are concerned. The constant search for high quality, continuous care and sensitivity towards stylistic trends and the continuous technological updates enable DEGREA to propose increasingly more modern products, which can make any house or commercial place exclusive and cosy, both indoor and outdoor.

La ligne Arena a été créée à la suite de l'intérêt croissant pour les vases qui ont la saveur d'une civilisation passée. La coloration claire rappelle la terre antique et répond à ces exigences en se colloquant entre les premières places des classements des ventes.
